JOURNAL OF AEROSOL SCIENCE

In association with the Gesellschaft für Aerosolforschung (GAeF)
Association for Aerosol Research

Founding Editor Prof. C. N. DAVIES (from 1970 to 1984)

Aims and Scope

The *Journal of Aerosol Science* is a long-established international publication which sets out to encourage and foster all aspects of basic and applied aerosol research by publishing high quality scientific papers in that very multidisciplinary field. The submission of original papers is encouraged, describing recent theoretical and experimental research relating to:

—the basic physical and chemical properties of particles in aerosol systems of all types
—their measurement
—their formation, transport and deposition
—their industrial, medical and environmental effects and applications.

Occasional reviews of broader interest may also be considered. The aim in all published articles is to present results in a form which can be generalized as far as possible.
